1. Executive Summary

Green Marvel (Pty) Ltd is a South African manufacturer of organic, pharmaceutically formulated hair care products, trading under the brand *Marvelously Green*. Founded in 2023 by young entrepreneurs with backgrounds in pharmaceutical sciences, the company offers a vertically integrated business: we grow our own raw materials, manufacture in-house, and sell directly to consumers through our e-commerce platform at greenmarvel.co.za. Green Marvel merges indigenous knowledge systems and traditional medicine with scientific validation to create safe, effective products.

Our flagship products — Vitality Hair Spray, Growth Oil, and Smooth Organic Hair Food — address a critical and overlooked gap in the South African market: hair care that is both highly effective and free from harmful synthetic chemicals. Where the global natural hair care movement has produced thousands of branded products, very few combine scientific rigor with organic integrity. Green Marvel does both.

Key Highlights

- **Female- and youth-founded** — aligned with EDHE's emphasis on advancing women and youth in entrepreneurship.
- **Vertically integrated** — we own our supply chain from farm to formulation to fulfillment, ensuring quality and cost control.
- **Pharmaceutically formulated** — our co-founders are pharmaceutical scientists; every product is lab-tested for safety and efficacy.
- **Live revenue** — we are an operational business with confirmed paying customers and a live e-commerce platform at greenmarvel.co.za.
- **Sustainability-aligned** — directly addresses EDHE's theme of entrepreneurship for sustainability through organic farming, chemical-free formulations, and local manufacturing.
- **Scalable model** — current infrastructure supports significant growth with the right operational and strategic support.

Purpose of This Profile

This profile is submitted for EDHE's consideration as Green Marvel seeks to identify the support, mentorship, and funding pathways within the EDHE ecosystem that best align with our growth stage and impact ambitions. We welcome the opportunity to engage further on how our venture can contribute to — and benefit from — the EDHE programme.

2. About Green Marvel

Green Marvel (Pty) Ltd was incorporated in South Africa on July 2023 (Reg. No. 2023/866045/07) in Mantserre, Rustenburg, North West Province. The business operates under the consumer brand Marvelously Green, which is the public-facing identity used across our products, packaging, and digital presence at greenmarvel.co.za.

The company was founded by Rosina Mamotlhagodi Sehone, Busisiwe Veronica Maphanga, Lindiwe Ester Khoza and Ramoagi Thimothy Segone — pharmaceutical sciences professionals who recognized that South Africa's hair care industry was dominated by either (a) imported premium organic brands at price points inaccessible to most South Africans, or (b) cheap mass-market products containing parabens, sulphates, and synthetic fragrances known to cause scalp irritation, breakage, and long-term damage.

Research and development of the founding product range began in 2021. Over a two-year period, our team conducted literature reviews, laboratory experimentation, and small-scale clinical testing to develop formulations that match — and in several categories exceed — the efficacy of leading commercial brands while remaining 100% organic and chemical-free.

Company Snapshot

Legal Name	Green Marvel (Pty) Ltd
Trading Name	*Marvelously Green*

Year Founded	2023 (R&D since 2021)
Headquarters	620 Park Street, Arcadia, Pretoria, South Africa
Ownership	100% Black-owned, 75% Female-owned
Website	greenmarvel.co.za

3. Mission, Vision & Values

Mission

To redefine hair care in Africa by providing 100% organic, herbal-based products that nourish, protect, and restore hair without harmful chemicals — making safe, scientifically formulated beauty accessible to every South African.

Vision

To become Africa's leading brand in natural hair care innovation, setting the standard for sustainable beauty through a self-sufficient supply chain, empowered local farmers, and state-of-the-art manufacturing that serves the global market — preserving nature while transforming lives.

Core Values

- **Scientific Integrity.** Every formulation is supported by literature review, laboratory experimentation, and stability testing — never marketing claims alone.
- **Organic Purity.** We commit to zero parabens, sulphates, synthetic fragrances, and animal-derived ingredients across our entire range.
- **Local First.** Where commercially feasible, we source raw materials, packaging, and services from South African suppliers — supporting domestic value chains.
- **Accessible Excellence.** Premium organic products at prices the South African market can afford, without compromising on quality.
- **Community Empowerment.** As we scale, we are committed to training and employing women and youth from the communities where we operate.
- **Environmental Responsibility.** From pesticide-free farming to recyclable packaging, sustainability is not a marketing claim — it is operational practice.

4. The Problem We Solve

South Africa's hair care market is shaped by a stubborn trade-off: consumers must choose between affordable products laden with harmful chemicals, or premium organic imports priced beyond the reach of most households. Furthermore, many existing organic alternatives rely on ingredients that lack scientific validation for hair growth. This leaves over 10 million women and children in South Africa struggling with hair growth challenges that deeply affect their confidence and self-esteem.

4.1 The Consumer Health Problem

Mainstream hair products commonly contain sulphates, parabens, formaldehyde-releasing preservatives, and synthetic fragrances. Long-term use has been associated with scalp irritation, hair breakage, allergic reactions, and — in published studies on African women using chemical relaxers — hormonal disruption and elevated cancer risk. South African consumers, particularly Black women whose hair textures are most affected, are disproportionately exposed.

4.2 The Market Gap

Imported organic brands (typically from the United States or Europe) are positioned at the luxury end of the market, often priced 3–5 times higher than mass-market alternatives. Local natural brands exist but are frequently formulated by individuals without formal scientific training, leading to inconsistent quality and unverified efficacy claims. There is no South African brand that combines (a) full organic credentials, (b) pharmaceutical-grade formulation, and (c) accessible pricing at scale.

4.3 The Supply Chain Problem

Even local brands that aspire to be 'natural' typically source ingredients through third-party importers, sacrificing both freshness and margin. Without control of the farm or the formulation, quality varies batch-to-batch, and pricing is exposed to global commodity volatility.

4.4 The Environmental Cost

Conventional cosmetics manufacturing generates significant chemical waste, relies on petroleum-derived ingredients, and ships products across thousands of kilometres — contributing to environmental degradation precisely while the consumer category positions itself as 'beauty' and 'wellness'.

5. Our Solution & Products

Green Marvel solves the price-quality-purity trilemma through vertical integration. We farm our own organic raw materials on land we control, manufacture in our own facility on the same site, formulate using pharmaceutical-grade methodology, and sell direct-to-consumer through our e-commerce platform. This compresses the value chain, eliminates intermediary margins, and delivers premium organic hair care at price points typical South African households can afford.

OUR HERO PRODUCTS

Vitality Hair Spray
Rapid Growth · Strengthen · Repair
100 mL · R130

Growth Hair Oil
Nourish · Revive · Grow
100 mL · R130

Smooth Hair Food
Moisturise · Repair· Volume
100 mL · R120

5.1 Our Approach

- **Farm-to-Bottle.** Active botanical ingredients are grown on our own farm in pesticide-free, controlled conditions, then harvested at peak potency and processed within hours.
- **Pharma-Grade Formulation.** Our founders apply Good Manufacturing Practice (GMP) principles — typically reserved for pharmaceuticals — to cosmetic production, ensuring consistent quality across every batch.
- **Lab-Tested Efficacy.** Every formulation undergoes laboratory analysis for safety, stability, and active ingredient concentration before release.
- **Direct-to-Consumer.** Our e-commerce platform at greenmarvel.co.za connects us directly with buyers, eliminating retailer markup and building first-party customer relationships.

5.2 Current Product Range

PRODUCT	PURPOSE	PRICE	STATUS
Vitality Hair Spray	Unlocks hair follicles, stimulates growth, reduces breakage. Daily-use leave-in formulation.	**R130**	Live
Growth Oil	Concentrated botanical oil blend for hair, beard, and children's hair. Promotes scalp health and follicle stimulation.	**R130**	Live
Smooth Organic Hair Food	Daily moisturising and strengthening formulation. Targets dryness, dullness, and split ends.	**R150**	Live
Body Lotion	Body care moisturiser; scar and stretch-mark treatment.	**TBC**	*Pipeline*
Wellness bandage	Wound treatment through herbs infused in a biodegradable bandage.	**TBC**	*Pipeline*
Anti-Dandruff Range	Targeted scalp treatment for dandruff and irritation.	**TBC**	*Pipeline*

5.3 What Makes Us Different

- **Zero compromise on ingredients.** No parabens, no sulphates, no formaldehyde-releasing preservatives, no synthetic fragrances.
- **Local manufacturing, local jobs.** Every Rand of revenue retains far more value in the South African economy than imported equivalents.
- **Scientifically credible.** Founded by trained pharmaceutical scientists — not influencer-founded with formulations outsourced.
- **Customer-direct.** Operational e-commerce platform with payment integration, order tracking, and SMS notifications.

6. Market Opportunity

The South African cosmetics market was estimated at R63.55 billion in 2023 and is projected to grow at approximately 4.97% annually through 2028, driven by rising disposable income, urbanisation, and shifting consumer preferences toward natural, locally produced products.

6.1 Total Addressable Market (TAM)

The South African hair care segment alone is estimated at R14+ billion annually. Within this, the natural / organic sub-segment is the fastest-growing category, expanding at more than double the rate of the overall market as consumers — particularly women aged 18–45 with natural and textured hair — actively seek chemical-free alternatives.

6.2 Serviceable Available Market (SAM)

Our initial focus is on the South African online and direct-sales segment for natural hair care, estimated at R1.8–2.4 billion annually. This market is currently fragmented across imported premium brands, independent local makers, and large retail private labels — none of which match Green Marvel's combination of organic credentials, scientific formulation, and price accessibility.

6.3 Initial Target Customer

Our core customer profile is women aged 18–45, of all ethnicities, in LSM 6–10, who:

- Identify with natural hair care, wellness, or clean beauty movements.
- Are willing to pay 20–40% more than mass-market for verifiably organic products, but are priced out of imported luxury alternatives.
- Are digitally engaged and comfortable purchasing through e-commerce and social commerce channels.
- Frequently purchase repeatedly within natural hair care once they find a brand that delivers results.

6.4 Competitive Positioning

Our positioning is deliberately differentiated:

ATTRIBUTE	IMPORTED ORGANIC	MARVELOUSLY GREEN
Price (typical 100ml)	R350 – R650	**R130 – R150**
100% organic	Yes	**Yes**
Scientifically formulated	Often	**Yes (pharma background)**
Made in South Africa	No	**Yes**

ATTRIBUTE	IMPORTED ORGANIC	MARVELOUSLY GREEN
Carbon footprint	High (imports)	**Low (local supply chain)**
Designed for SA hair textures	Sometimes	**Yes**

7. Business Model

7.1 Revenue Model

Green Marvel operates a direct-to-consumer (D2C) e-commerce model with three planned revenue channels:

- **Online sales (current primary channel).** Customers purchase through greenmarvel.co.za with integrated Payfast payment and The Courier Guy fulfillment nationwide.
- **Wholesale / retail partnerships (in development).** Bulk supply to independent salons, beauty retailers, and lifestyle boutiques at margin-supportive wholesale pricing.
- **B2B / corporate gifting (early stage).** Custom branded gift sets for corporate clients seeking locally-made, premium, ethically sourced gifts.

7.2 Cost Structure

Our vertically integrated model produces a structurally superior cost profile:

- Cost of Goods Sold (COGS): ~25–30% of revenue (versus 45–60% typical for imported organic brands).
- Logistics & fulfillment: ~8–12% of revenue.
- Marketing & customer acquisition: ~15–20% of revenue, primarily digital.
- Operations & overhead: ~10–15% of revenue.
- Resulting gross margins of 65–75%, with a clear path to 25%+ operating margins at scale.

7.3 Unit Economics

At our current price points and current order volumes, the average order value is approximately R260, with a contribution margin per order of approximately R175. Customer acquisition cost is currently under R80 per first-time customer through organic social and word-of-mouth, indicating a healthy unit economics profile and significant headroom for paid acquisition once funding is secured.

7.4 Operational Infrastructure

- Functioning e-commerce platform at greenmarvel.co.za, built on Django with Payfast payment integration, The Courier Guy shipping rate API, automated SMS order notifications, and an admin fulfillment dashboard.
- In-house formulation and small-batch manufacturing capacity at the Mantserre facility.
- Direct relationships with all current suppliers, with no critical dependencies on intermediaries.
- Compliant company registration, tax registration, and Capitec Business banking infrastructure.

8. Traction & Growth Projections

Green Marvel is operational and revenue-generating. Below is our historical performance and forward growth projection, reflecting both conservative and accelerated scenarios.

YEAR	ORDERS	GROSS REVENUE	NET REVENUE
2024	~1 000	**R 110 000**	R 14 000
2025	~3 000	**R 330 000**	R 171 000
2026	20 000	**R 2 200 000**	R 1 399 860
2027	100 000	**R 11 000 000**	R 7 000 000
2028	160 000	**R 17 600 000**	R 11 200 000

Shaded rows reflect actual performance. Unshaded rows are forward-looking forecasts contingent on funding and execution of the growth plan outlined in Section 10.

Key Milestones Achieved

- Product range developed, tested, and commercially launched.
- Company registered as a private company in South Africa.
- Functional e-commerce platform live with full payment, shipping, and fulfillment integration.
- Active social media presence on TikTok (@greenmarvel_HAIRCARE).
- Confirmed first-time and repeat customers, validating product-market fit.
- Pilot wholesale enquiries from independent beauty retailers in Gauteng and North West.

9. Founding Team

Green Marvel is led by three co-founders with complementary expertise in pharmaceutical science, business operations, and product development. All three founders are actively engaged in day-to-day operations.

Ramoagi Thimothy Segone
Founder & Chief Executive Officer

Ramoagi leads the company's strategic direction, business development, and external partnerships. He oversees Green Marvel's e-commerce operations, growth strategy, and is the principal applicant for this submission. His vision combines scientific credibility with commercial scale ambition.

Rosina Mamotlhagodi Sehone
Co-Founder

Rosina is a co-founder of Green Marvel and contributed to the early formulation work and quality framework that underpins the product range. She brings deep knowledge of the pharmaceutical and quality control principles that distinguish Green Marvel from typical natural-products competitors.

Busisiwe Veronica Maphanga
Co-Founder

Busisiwe is a co-founder of Green Marvel and contributed substantially to the research, formulation, and laboratory testing of the founding product range. Her scientific rigor ensures every product released by the company meets pharmaceutical-grade standards for safety and efficacy.

Team Composition Alignment with EDHE Priorities

- **Female-led:** Three co-founders are women — directly aligned with EDHE's emphasis on advancing female entrepreneurship.
- **Black-owned:** 100% of equity held by Black South African citizens, contributing to economic transformation goals.
- **Science-credentialed:** All three founders carry pharmaceutical sciences training, providing a defensible technical moat.

10. Growth Opportunities

Green Marvel is an operational, revenue-generating business with strong fundamentals, a clear value proposition, and a proven team. We have reached the point in our growth where strategic support — whether financial, operational, mentorship-based, or through programme-level partnership — would meaningfully accelerate the impact and reach of our work.

Below we outline the four areas where growth support would generate the highest leverage. We are not approaching EDHE with a fixed funding request; rather, we welcome the opportunity to engage on which forms of support — funding, mentorship, market access, training, or other — best align with the EDHE programme's mandate and our stage of development.

Priority Growth Areas

AREA	WHAT GROWTH SUPPORT WOULD ENABLE
Manufacturing capacity	Expansion of mixing, filling, and quality testing infrastructure to scale weekly production from current levels to meet projected wholesale and direct-to-consumer demand.
Regulatory compliance	Formal SABS approval, Proudly South African registrations, retail-ready certifications, and the systems required to onboard major retail partners.
Brand & customer acquisition	Sustained digital marketing, influencer partnerships, content production, and professional product photography to build national brand recognition.
Working capital & inventory	Strengthened inventory buffer to capture wholesale opportunities, reduce stockout risk, and unlock supplier discounts through bulk purchasing.
Mentorship & networks	Access to industry mentors, retail buyer networks, and peer founder communities to navigate scale-up challenges and access strategic partnerships.

12-Month Goals (with right partnerships in place)

- Scale weekly production capacity meaningfully beyond current output.
- Achieve SABS certification and Proudly South African registrations.
- Onboard our first wholesale retail partners across Gauteng and in all other provinces.
- Grow our active customer base substantially through targeted marketing.
- Hire and train additional staff members from the local community.
- Move toward the revenue trajectory outlined in Section 8.

Why Engage with Green Marvel

Beyond financial returns, any support extended to Green Marvel generates outcomes the EDHE programme exists to enable: a profitable, sustainable South African student-owned business; new local employment in an under-served rural community; demonstrated commercialisation of research-grounded innovation; and a flagship case study showcasing what young South African founders can build when supported. We invite EDHE to consider where Green Marvel best fits within its support ecosystem, and we welcome any next steps the programme finds appropriate.

11. Social & Environmental Impact

Green Marvel is fundamentally a sustainability-oriented business. Our impact is generated not through CSR add-ons but through how the business itself is structured.

11.1 Environmental Impact

- **Pesticide-free cultivation.** Our raw materials are grown without synthetic pesticides or herbicides, protecting local soil health and groundwater.
- **Short supply chain.** Local farming and manufacturing reduce transport-related emissions compared to imported alternatives.
- **Chemical-free formulations.** By eliminating petroleum-derived ingredients, we reduce downstream water contamination from product washoff.
- **Recyclable packaging (in progress).** We are transitioning our packaging range to fully recyclable and minimally processed materials by end of 2026.

11.2 Social Impact

- **Local employment.** Every job created in our farm and manufacturing facility is in a rural North West community, where formal employment opportunities are limited.
- **Skills transfer.** Staff receive pharmaceutical-grade training in quality control, manufacturing hygiene, and product handling — skills that travel with them throughout their careers.
- **Female and youth empowerment.** Our hiring policy preferentially recruits women and young people from the South African Communities.
- **Affordable health-positive products.** By pricing organic hair care 50–70% below imported equivalents, we make safer products accessible to households that previously could not afford them.

11.3 Alignment with UN Sustainable Development Goals

- SDG 3 — Good Health & Wellbeing: chemical-free formulations reduce consumer exposure to known irritants and endocrine disruptors.
- SDG 5 — Gender Equality: female-led ownership and preferential employment of women.
- SDG 8 — Decent Work & Economic Growth: local manufacturing jobs in an under-served rural area.
- SDG 12 — Responsible Consumption & Production: vertically integrated sustainable supply chain.
- SDG 15 — Life on Land: pesticide-free farming preserves soil and ecosystem health.

11.4 Alignment with EDHE's Sustainability Focus

Green Marvel directly addresses EDHE's emphasis on 'Entrepreneurship for Sustainability.' We are a financially sustainable venture — already operational and revenue-generating — that exists explicitly to solve documented health and environmental problems in the cosmetics value chain. Our model is scalable across South Africa and the broader African market without compromising the principles that make it impactful in the first place.
