Professional Summary

I am a highly organized and self-driven team player with strong interpersonal and communication skills. I am also a strategic thinker with a comprehensive understanding of the academic space and teaching, and quick to adapt to new technological advancements. I enormously believe in influential leadership, therefore my approach to situations is usually that which has me seeking to better myself, those around me and my students. I have over five years of teaching experience in the University and I continuously learn new concepts to provide my students with quality education, which they can clearly understand and relate to.
